

Kraft Micaceous Iron Oxide

Kraft Chemical's Micaceous Iron Oxide meets the European E172 Standard for Heavy Metals. Kraft Micaceous Iron Oxide is also Heavy Metal and OVI (Hazardous Solvents) compliant with the USP/NF, FCC as well as the current European Standards. This specification would be:

- Arsenic less than 5 ppm
- Lead less than 20 ppm
- Mercury less than 1 ppm
- Cadmium less than 5 ppm
- Chromium less than 100 ppm
- Copper less than 50 ppm
- Zinc less than 100 ppm

Kraft Micaceous Iron Oxide is free of any animal parts or byproducts. Kraft Micaceous Iron Oxide is free of any VOC Compounds (Volatile Organic Compounds) such as: Chloroform, 1,4 Dioxane, Trichloroethylene, Benzene and Ethylene Oxide.
